

The NEO Impact Threat: A Petition to Congress

March 10, 2008

Honorable Members of the House Subcommittee for Space and Aeronautics:

Re: The NEO Preparedness Act

Given the dire and potentially imminent nature of this threat and the complete absence of any developed capability to effectively defend against it, we the undersigned endorse and encourage the immediate passage of H.R. 4917 The NEO Preparedness Act into law at the earliest possible opportunity and by any means necessary. With this act you will take a small but crucial strategic step towards mitigating this perpetual threat and in doing so demonstrate both a national political will and global leadership in dealing with this emergent human reality.
